Keep your head up...
Dive māoï

Māoï, a head up display dive computer

Unique, māoï is the first head-up dive computer from Thalatoo. Concentrate of technology, its compact housing fits very easily to every kind of masks.

You said innovations? A transparent screen displays safety information, without any disruption of his field of vision. A smart mode adapts to the situation of the diver by displaying the strictly necessary information when required, improving the underwater experience without any sacrificing to safety.

Simple programming makes it possible to upgrade the dive profile from recreational to more technical levels, but also to access new functions (compass, multi-gas ...) and some evolutionary updates.

Technical datas

LCD display
monochrome transflectif

Interface buttons (2)

Li-ion Battery Rechargeable par USB
Autonomy of 40 hours of diving

Compass 3 axis integrated and corrected

HUD Thalatoo

Weight	190 g
Maximum depth	60 m
Fixation kit (default)	Over-strap with suction cup brackets M & XL
Fixation kit (optional)	Fixation kit for leisure half-face mask with rigid frame Holder kit for full-face masks (Guardian, Spektrum ...)

Algorithms and decompression model

Decompression model	Bühlmann ZHL16C
Gaz	Air , Nitrox (updatable)
Altitude	Automatic
PPO2 max	1.4 (default) ou 1.6
Personnel health adjustment	3 levels pre-set
User configurable alert	Dive time
Planification	yes
Units	Metric (m/°C) Imperial (feet/°F)
Display mode	smart(default) or classical

Dive log

Dive memory	100 dives (20 accessible fromMAOI)
Communication	USB cabe and adaptator (included)
Log Book	Māoï dive Log V1 Compatible with most online logbooks

3.5 cm (1.2 inch)

9.6 cm (3.5 inch)

6.7 cm (2.4 inch)

8.8 cm (3.1 inch)

3,5 cm (1,. inch)

6 cm (2.4 inch)
