

MeetingEye 500

MeetingEye 500

Separate design, Android codec for Large to Ex-Large rooms

As the new generation [video conferencing system](#), Yealink MeetingEye 500 is suitable for various types of meeting rooms. It supports 4Kp30 UHD video and content sharing. You can present different 4K video and content on three screens and select the display layout as you like. *MeetingEye 500 can work with the Yealink 36x hybrid zoom 4K UHD PTZ camera or third-party cameras, regarding as the ideal solution for small and medium meeting rooms. When MeetingEye 500 combines with the microphone array, each microphone can reach 10ft (3m) and 360° voice pickup range. Also, MeetingEye 500 can work with Yealink's new soundbar, providing a professional sound experience. Its VCH interface is able to convey not only the data and control signal but also the power needed for MeetingEye 500, realizing the minimalist deployment and reducing cost. Furthermore, it allows multiple content sharing methods, adapts to any computer.

Key Features and Benefits

Smart Experience

MeetingEye 500 works with AI cameras to achieve AI technologies, including Auto Framing and Speaker Tracking, allowing users to experience smarter and safer video conferences.

* Three Screens, Efficient Meeting

Yealink MeetingEye 500 provides three HDMI outputs supporting high-definition display without the tedious switching of pictures and devices. Three displays can present different views and content information, realizing efficient communication.

Separate Design, Minimalist Deployment

Adopts a separate design, Yealink MeetingEye 500 allows installation and deployment such as hanging wall, putting on/hanging under the desk, or mounting in a rack. Its VCH interface is able to convey not only the data and control signal but also the power needed for MeetingEye 500, realizing the minimalist deployment and reducing cost.

Compatible with Third-party Pro audio

UVC86 is compatible with third-party pro audio to support for more microphone setting. This allows users to enjoy different microphone device experiences in meetings.

USB Mode, Act as PC Audio & Video Peripherals

Yealink MeetingEye 500 can cover multiple scenarios in conference rooms by working with Yealink cameras and audio devices. It can work with VCH51 and act as the PC audio and video peripherals via a USB Type-C cable to provide an excellent audio and video experience.

**** The current version supports dual-screen display, and triple-screen display will be supported in the next version.**

UVC84-Lieferumfang(Kamera) - Paquete UVC84 (cámara) - Emballage UVC84 (caméra)

UVC86 Package (Camera)

UVC86-Lieferumfang(Kamera) - Paquete UVC86 (cámara) - Emballage UVC86 (caméra)

Installation

Mount on the Wall

Stick to the Table

Put on the Desk

Mount in a Rack

i NOTE

The rack in which the MeetingEye 500 will be placed must be a 19-inch Rack compliant with IEC 60297.

1. Install the mounting ears to the sides of the MeetingEye 500.

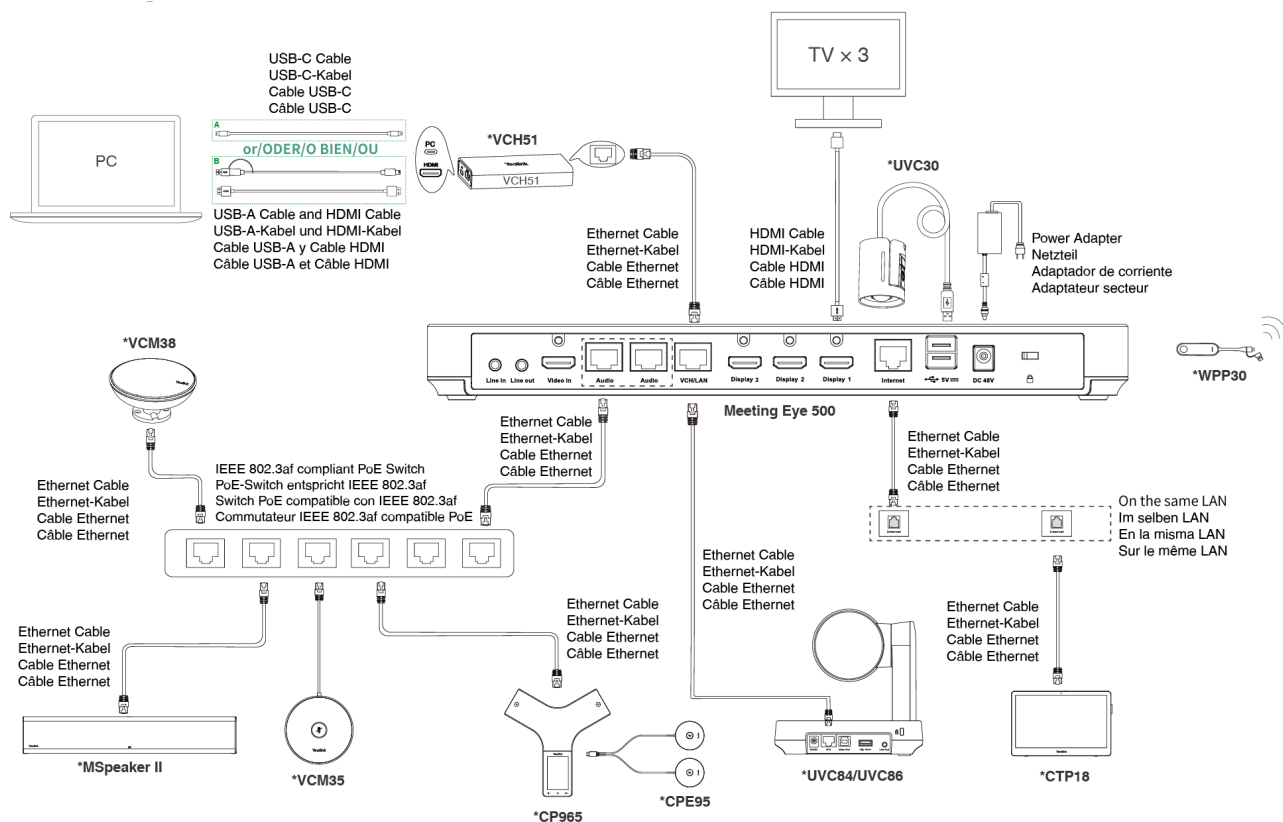

2. Push the MeetingEye 500 into the rack, and then fix it to the rack with screws.

i NOTE

Package Contents do not include screws.

Connections

NOTE

- The current version supports dual-screen display, and triple-screen display will be supported in the next version.
- The Audio port also allows connecting non-audio devices such as cameras. However, it is recommended to connect audio devices to the Audio port for better performance.

Supported Accessories

For the compatible devices and the maximum number of compatible devices, please refer to [Zoom Rooms Accessories Compatibility Lists](#).
