BACNET INTEGRATION

If the central battery system has a BACnet module, it provides a direct interface to a building automation system. In BACnet integration, all the information of the central battery system, which is imported into BACnet as objects, are available.

Teknoware's interface is the BACnet module, which transmits the BACnet objects from the central battery system and the luminaires. Battery and luminaire tests can also be initiated in this way.

BACnet system is commonly used through a third party user interface.
