

**DUAL PRE-POWER AMPLIFIER WITH DC VOLUME CONTROL**

The KA22134 is a monolithic integrated circuit designed for use in low voltage and low power applications. It has all functions including a dual audio pre-power amplifier, DC volume control and headphone drive circuits.

It is suitable for portable tape recorders or headphone cassette recorders.

**FEATURES**

- Built-in DC volume control circuit.
- Wide operation supply voltage:  $V_{CC} = 1.8 \sim 6V$
- Only a few components to build headphone cassette tape recorders.
- Built-in ripple filter.
