Introduction

The PIR-130 module includes a 1-channel passive infrared (PIR) sensor that is able to detect infrared waves generated by human within a range of approximately 8 meters in diameter with a 360° coverage area. The PIR-130 is used for indoor motion detection, and can be configured to automatically switch on a light if motion is detected.

The PIR-130 module also includes a 1-channel temperature sensor that can be used for measuring room temperature or can be configured to activate a fire alarm.
Applications

- Common toilets, for lights & exhaust fans
- Common staircases
- For parking lights
- For garden lights
- For changing rooms in shops
- For corridors & many more
