Skin Contact Statement

Information

The following grades of Candle Waxes have been independently assessed for their suitability for direct skin contact applications, for example, being used as part of a Massage Candle formulation or inclusion within natural skincare products.

The testing took the form of a 96 hour primary irritation skin patch test in a shared panel of 30 healthy volunteers – no animal testing was involved in the study.

- EcoCoco Container
- EcoCoco Pillar
- EcoOlive Container
- EcoOlive Pillar
- EcoSoya CB Advanced
- EcoSoya Melt
- EcoSoya Pillar
- KeraSoy Container
- KeraSoy Pillar

Based upon the findings of the study, the following statements may be attributed to the wax phase of articles manufactured from the above grades:

- Dermatologically Tested
- Clinically Tested
- Clinically Proven
- Kind to Skin
- Safe for Skin
- Mild for Skin

Consideration, however, should be given to the composition of fragrance oils and dyes before making claims for mixtures of the waxes and other ingredients.
