

Spring-return actuator for fire and smoke dampers 90° in ventilation and air-conditioning systems

- Torque motor 9 Nm / 7 Nm
- Nominal voltage AC 230 V
- Control Open/close
- Mechanical interface Form fit 12x12 mm, continuous hollow shaft

Technical data Safety data Ambient temperature safety operation The safety position will be attained up to max. 75°C Storage temperature -40...80°C [-40...176°F] maintenance-free Weight Weight Use of the safety position will be attained up to max. 75°C 1.3 kg

Safety notes

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- · Caution: Power supply voltage!
- The actuator is adapted and installed on the fire and smoke damper by the damper manufacturer. For this reason, the actuator is only supplied directly to safety damper manufacturers. The manufacturer then bears full responsibility for the proper functioning of the damper.
- The two switches integrated in the actuator are to be operated either on power supply voltage or at safety extra-low voltage. The combination power supply voltage/safety extralow voltage is not permitted.
- · Cables must not be removed from the device.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Operating mode

The actuator moves the damper to the operating position at the same time as tensioning the return spring. The damper is turned back to the safety position by spring energy when the supply voltage is interrupted.

Safety Position Lock™

The Safety Position Lock™ reliably holds the fire damper in the safety position in case of fire therefore ensuring maximum safety. The technical solution for this function of the BFL and BFN actuators has a patent pending.

Manual override

Without power supply, the actuator can be operated manually and fixed in any required position. It can be unlocked manually or automatically by applying the supply voltage.

Signalling

Two microswitches with fixed settings are installed in the actuator for indicating the damper end positions. The electrical contacts of these microswitches are equipped with a gold/silver coating that permits integration both in circuits with low currents (mA range) and in ones with larger-sized currents (A range) in accordance with the specifications in the data sheet. It should be noted with this application however that the contacts can no longer be used in the milliampere range after larger currents have been applied to them, even if this has taken place only once.

The position of the damper blade can be read off on a mechanical position indication.

Standards / Regulations

The design of the actuator is based on the specific requirements from the European standards:

- EN 15650 Ventilation for buildings Fire dampers
- EN 1366-2 Fire resistance tests on service installations

(Part 2: Fire dampers)

- EN 13501-3 Fire classification of construction products and building elements

(Part 3: Classification using data from fire resistance tests on products and elements used in building service installations: fire resisting ducts and fire dampers)

Product features

Recommendation for application

The regular operational check (open/close control of the fire damper) enhances the safety of people, animals, property and the environment. Unless other requirements are stipulated – e.g. in the damper manufacturer's operating instructions – Belimo recommends the performance of a monthly operational check. Fire damper actuators from Belimo are designed in accordance with service life specifications contained in the technical data sheet for regular operational checks. Notes for regular operational checks can be found in the European Product Standard for Fire Dampers (EN 15650) under "Maintenance information".

Parts included

Hand crank Pointer Protective bag

Accessories

| Electrical accessories | Description | Туре |
|------------------------|---|------------|
| | Communication and power supply unit for fire damper actuators 230 V | BKN230-MOD |
| | Auxiliary switch 2x SPDT | SN2-C7 |
| | Cable set with plug 0.5 m for communication and power supply unit | ZST-BS |
| Mechanical accessories | Description | Туре |
| | Bracket for SN2-C7 for BFN/BFL, BEN/BEE | ZSN-B |
| | Pointer 12x12 mm | ZZN12-B |
| | Hand crank 40 mm | ZKN1-B |
| | Hand crank 63 mm | ZKN2-B |
| | Form fit insert 12/11 mm | ZA11-B |
| | Protective bag with wire, Multipack 100 pcs. | ZSD-B.1 |

Electrical installation

Caution: Power supply voltage!

The actuator must be protected by a fuse that does not exceed 16 A.

Parallel connection of other actuators possible. Observe the performance data.

Combination of power supply voltage and safety extra-low voltage not permitted at the both auxiliary switches.
